ABOUT THE PROJECT:

The scope of work consists of providing CM/GC services for three projects (Mid-Coast Corridor Light Rail Transit, San Diego River Double Track, and the Elvira to Morena Double Track) projects. The first phase of the projects is called "Preconstruction Services" which is anticipated to begin Spring 2014 and run through Summer 2015.

FOR MORE INFORMATION EMAIL:
Info.midcoast@stacywitbeck.com

POTENTIAL PRECONSTRUCTION SUBCONTRACTING OPPORTUNITIES:

We are looking for qualified DBE and UDBE firms to support the preconstruction tasks as noted in RFP Attachment 1, Section 1.0 Scope of Preconstruction Services.

Opportunities exist for both pre-construction and construction. Upon award of the contract, MCTC will develop work packages and conduct outreach events for subcontracting opportunities during construction.

DUMPSITES, SAND, GRAVEL & BASE

(800) DUMP-SITE • (714) 777-6400

not limited to roadway temporary and permanent striping, bearing pad replacements and traffic control and signage. The New Face of the Central Terminal Area (NCTA): This improvement is designed to enhance the appearance of the LAX CTA by installing new roadway lights and light bands around the terminal buildings to extend the architectural theme of the pylons at the entrance to LAX. Both of these features are integral parts that define the architectural aesthetic vision of LAX. World Way South/Center Way Traffic Improvement (Traffic Improvement or WWS/CWT): The World Way South/Center Way component is part of a traffic improvement measure for LAWA's Bradley West Core Project. In anticipation of an increase in vehicular traffic in the Central Terminal Area, the World Way South/Center Way work will add an additional lane from the World Way South transition to the south bound Sepulveda, Traffic Signal Upgrade and other related improvements. This, along with other upgrades, will improve the traffic flow at that intersection and the entire LAX CTA. Related improvements: There are a number of Second Level Roadway and the New Face of the CTA related improvements that are currently under development such as upper level canopies, traffic signal modifications, Light Band (Light Ribbon) Extension, and other miscellaneous improvements. LAWA will utilize Allowances for this work due to the level of design available.
